QUALITY & MANUFACTURING

We manufacture our glass infrared heaters with isolation class 2 and IP45 construction which makes them water-resistant so they are perfect for wet rooms and bathrooms – and the triple safety element means that there's no chance of overheating. Each heater is manufactured to the following standards in the EU:

- ❖ 2004/108/EC on electromagnetic compatibility
- ❖ 2006/95/EC on low voltage
- ❖ 2002/95/EC on the restrictions of the use of certain hazardous substances
- ❖ CE Certified
- ❖ EN / IEC 60335-1 Safety of Electrical Appliances
